

Baby Bidou

announces a happy event...

The family grows-up!

*Ptite Lazine and Petit Bidou are pleased to announce the birth of their young brother.
With a beige and caramel color, he is called Petit Doudou, is 15 cm tall and weights 10.9 g.*

... Let's wish him success and happiness with young children!

Like his elders, **P'tit Doudz** is an MP3 teddy bear equipped with a hi-fi loudspeaker and an integrated microphone. His volume is limited by parental control, he can be tied to the bed or to the buggy and its buttons can be locked for the youngest ones. No small part can be detached and swallowed. Accesses to the batteries and to all connectors are secured by screws and do not present any danger for children. Thanks to its strong design, its shell is able to withstand hits, bites, crashes and other bad treatments... Baby Bidou's teddy bears have passed toys safety tests and are fit for children **even below 36 months**.

Made in France like the rest of the family, P'tit Doudz, the beige/caramel MP3 teddy bear for children , is joining P'tite Zazine (pink color) and P'tit Bidou (blue color). Their are all available now on Baby Bidou Web site: **www.babybidou.com**

About Baby Bidou:

Created in 2006 to put technology at the service of young children, the French start-up Baby Bidou has set-up at the heart of Sophia Antipolis' high tech park. With the creation of the first Web site specialized in the downloading of music, tales and songs for children, Baby Bidou allows parents to have their children listen to their preferred music. Thanks to partnerships with artists for children from all around the World, we propose a musical and cultural diversity on the site **www.babybidou.com**, for the entertainment of children and grown-ups.
